KUNZ GmbH Aircraft Equipment is a globally active, family-owned company based in Germany, which supplies the aviation industry with machines and devices for aircraft wheels and brakes maintenance as well as aircraft recovery equipment. Our customers are international airlines, aircraft maintenance organisations, aircraft manufacturers, airport operators or the military.

We are searching for a

Computer scientist / programmer (f/m/d)

Your tasks:

— Development of interfaces between our machines and ERP / MES systems
— Development of backend software in the area of server systems
— Development of information displays and reports for our machines

Your profile:

You are familiar with web-based access to SQL servers (PostgreSQL), web programming, PHP, JavaScript and HTML5.

You have experience in dealing with edge gateways and industrial protocols, e.g. SCADA.

You should also be fit in the design of database and backup structures.

Knowledge of the programming languages C, VBS and SQL would also be an advantage.

Please send applications to Mr. Andreas Fuge, Andreas.Fuge@kunz-aircraft.com
